Org	Source System	Services Provided
OnTrack Rogue Valley	ONTRACK	SUD group therapy, DUII classes (Level I/II, Fast-Track), day treatment, relapse prevention, UA drug screens, case management, mental health
Recovery Café	RECOVERY_CAFE	Peer coaching, men's/women's recovery circles, community meals, mindfulness workshops, support circles
Rogue Retreat	ROGUE_RETREAT	Emergency shelter (Kelly, Heartside, Hope Village), urban campground, transitional housing, safe parking
St. Vincent de Paul (Ashland)	STVDP	Food pantry, community meals, direct financial aid, baby/family pantry
Jackson County Syringe Exchange	JACKSON_COUNTY_SSP	Harm reduction supply exchange (syringes, Narcan kits, fentanyl test strips)
ACCESS (HUD HMIS)	ACCESS_HUD	Emergency shelter bed nights, food boxes, utility vouchers, case management, rental assistance
Harry & David	HARRY_DAVID	Seasonal food distribution (Moose Munch, Royal Riviera pears, gift packs, themed food boxes)
Medford Seventh Day Adventist Church	MSDAC	Food boxes, prayer sessions, clothing vouchers, utility referrals (faith-based drop-in)

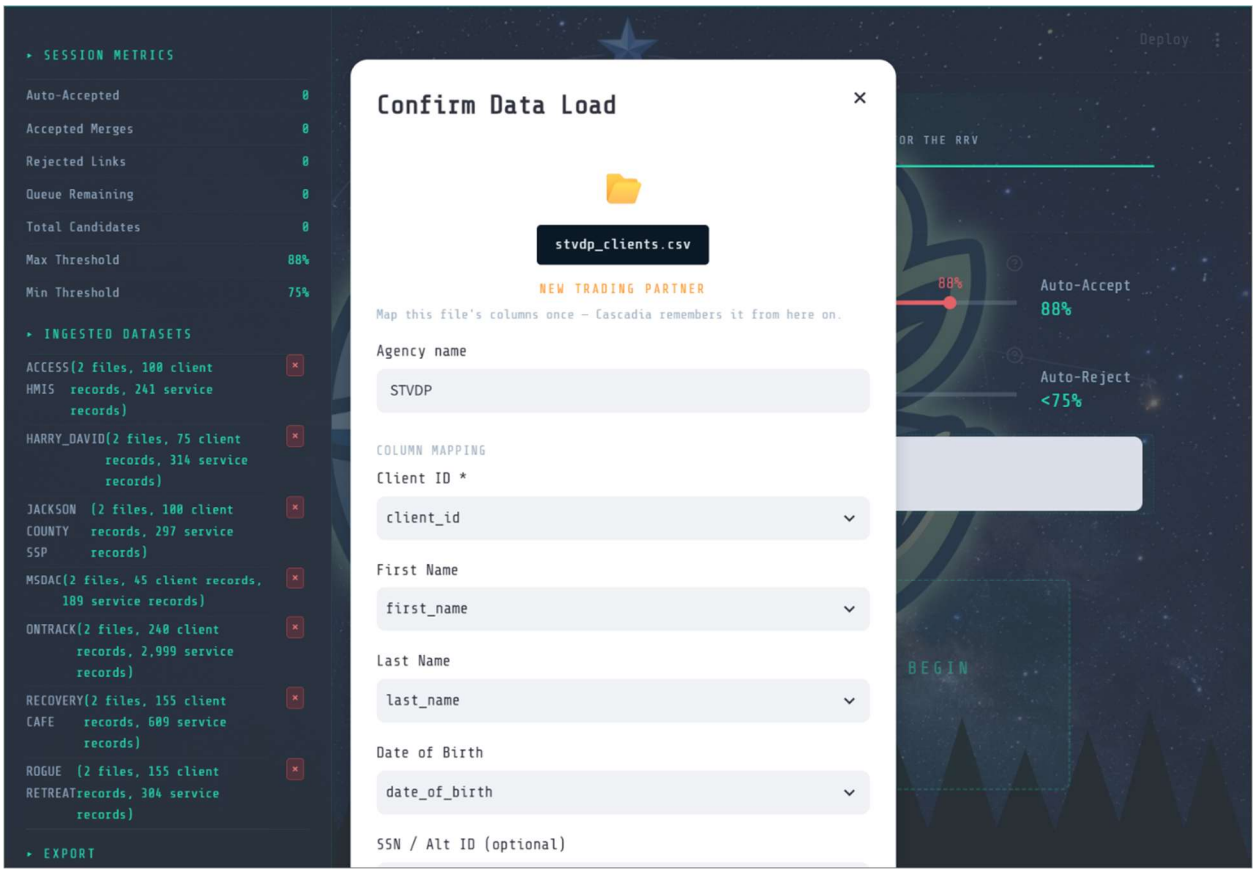

Home screen

The home screen is the command center for the C3E Master Data Engine. Adjust the confidence thresholds to control how aggressively the engine links records before surfacing them for manual review.

Confidence Max Threshold slider

Confidence Min Threshold slider

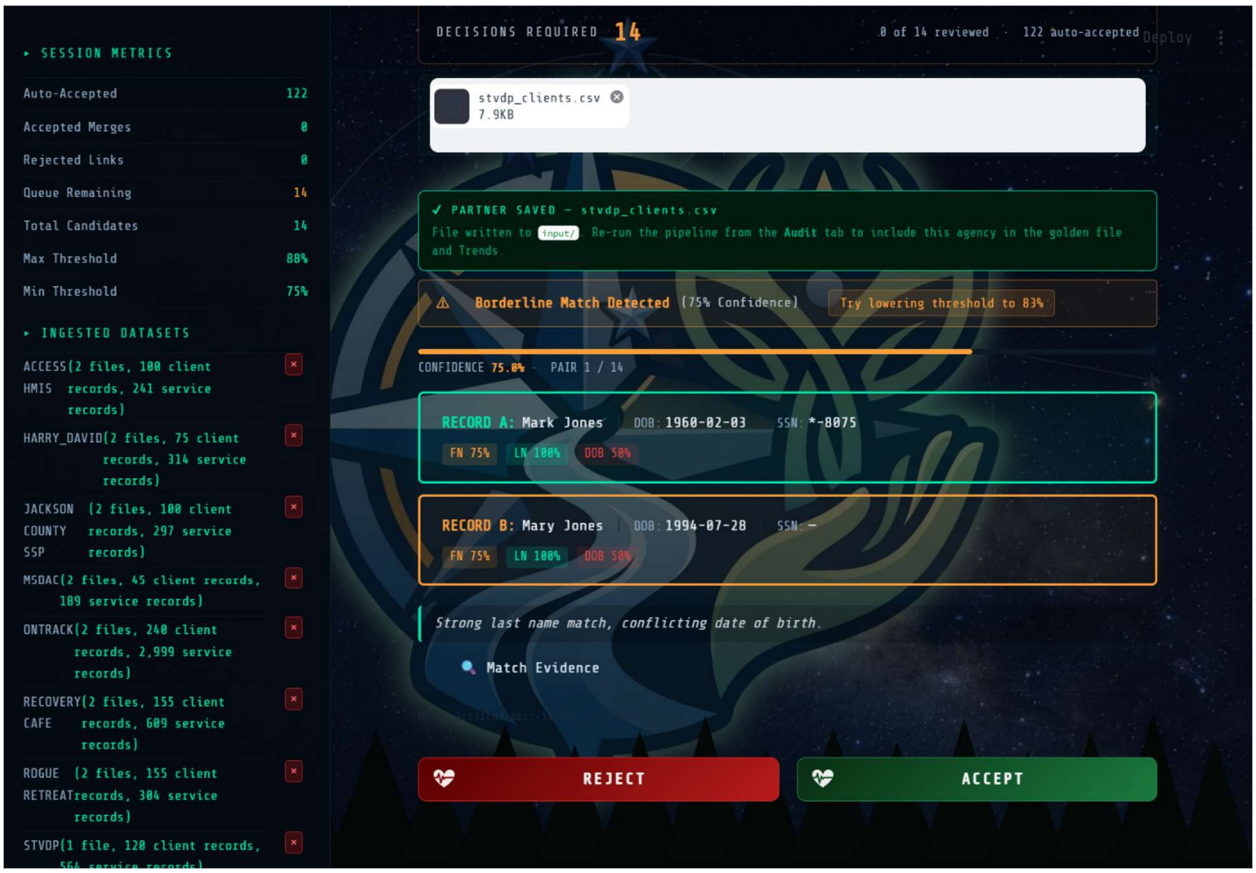

Trading Partner Manager Screen

Drop in any agency's CSV and the engine auto-detects column headers using fuzzy matching. Confirm the mapping in seconds — saved as a JSON schema file and remembered for every future run, no reconfiguration needed.

Allows configuration of column mappings.

Store in json schema file.

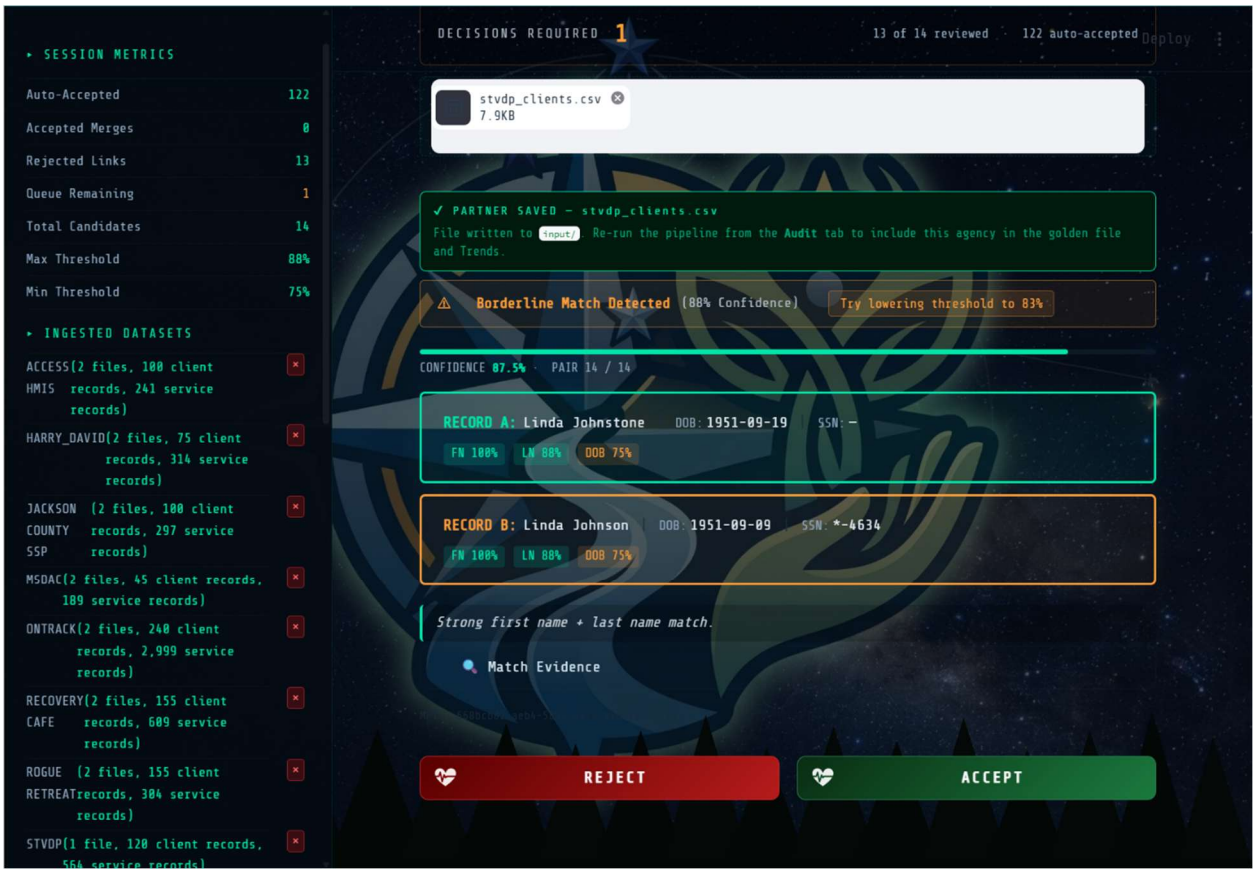

Swipe Deck Screen

Reject merging the Mark Jones and Mary Jones records.

Confidence is almost of the bottom at 75%

NOTE: 14/120 records require manual decision.

> *The review queue shows only pairs that scored above the minimum threshold but below the auto-accept ceiling. A single click rejects the merge; the decision is logged as negative training feedback to sharpen future matches.*

Swipe Deck Screen

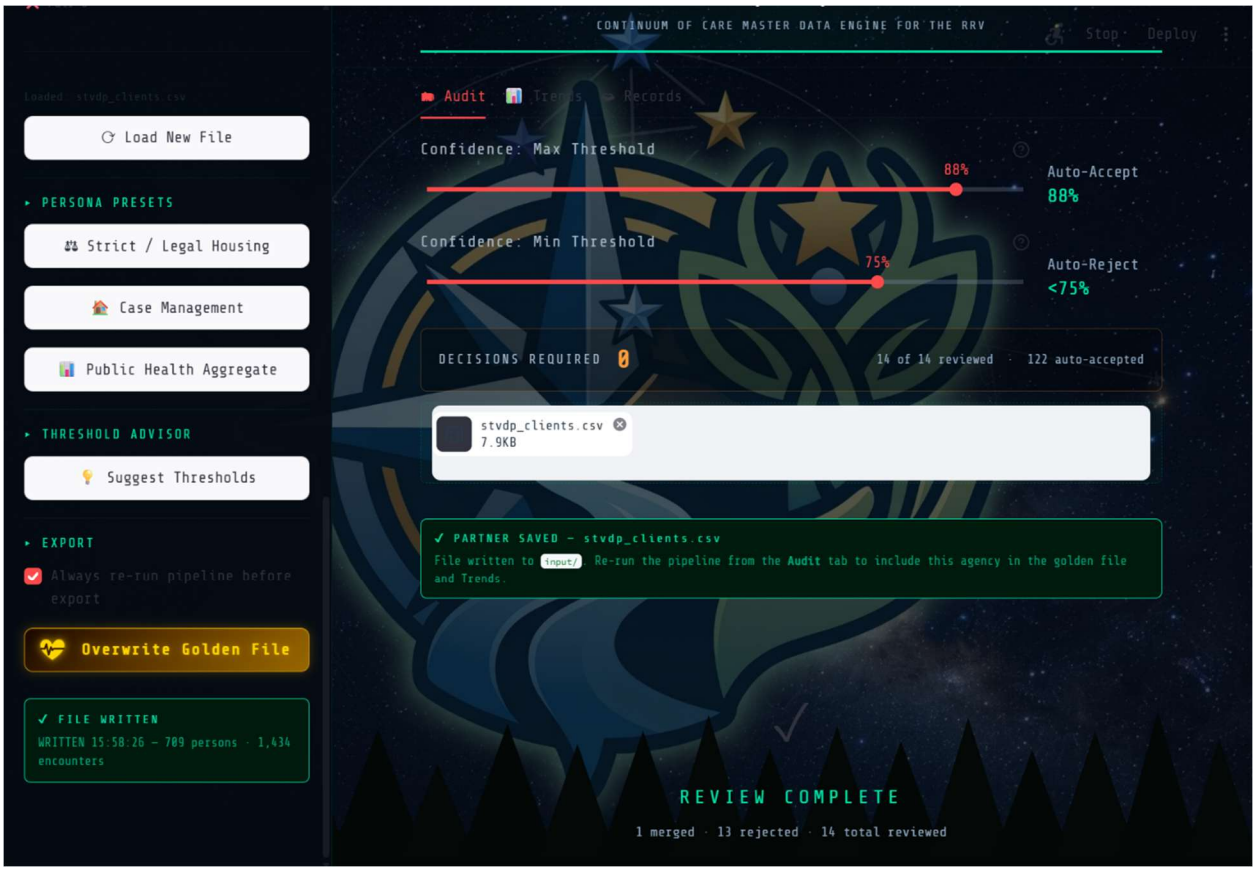

Accept Merging Linda Johnstone record with Linda Johnson record.

Birthdays are extremely similar.

Only one record has a SSN.

Confidence of 87.5% is nearly auto accepted, but still needs human to review.

> *Matching fields highlight in teal; discrepancies appear in amber. Accepting a merge assigns both records a shared Master Person ID, linking their full service histories across every contributing agency.*

Overwrite Golden Files button

On click, the system applies all accepted merges and sever overrides, then writes two flat files ready for county reporting:

Re-runs the pipeline and create files.

1. **GOLDEN_PERSONS.csv**

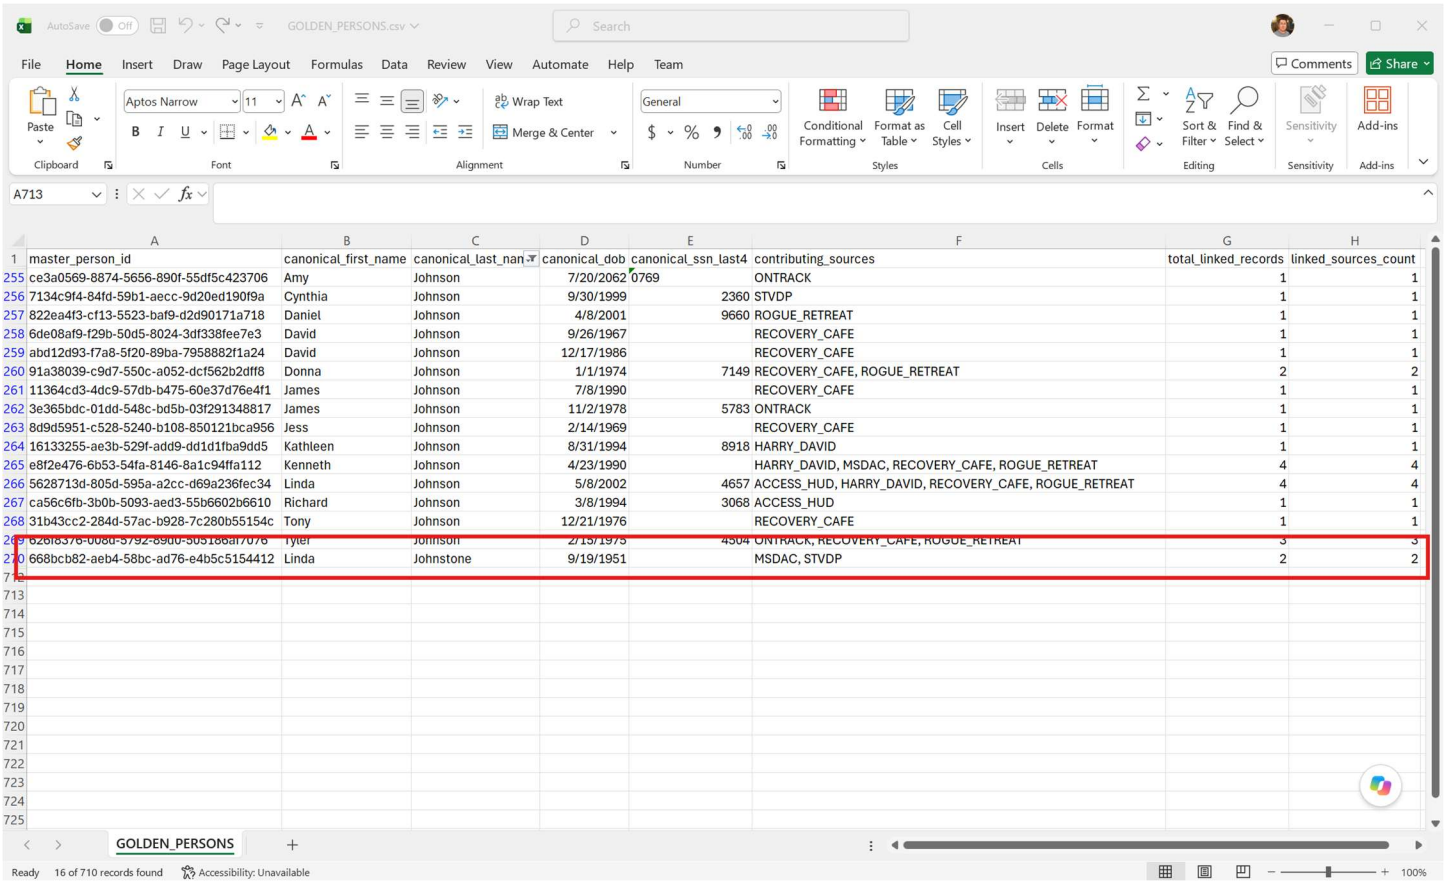

One row per deduplicated person. The contributing_sources column shows every agency that served this individual — the authoritative cross-agency census.

   a. Master data file of persons from all homeless service in RRV.

2. **GOLDEN_PERSONS_ENCOUNTERS.csv**

Every service encounter from every agency, joined to the same master person ID. Ready for trend analysis, commissioner reporting, and case review.

   a. Master data file of which persons received which services and when.

GOLDEN_PERSONS.csv

The contributing_sources column now reads MSDAC, STVDP — one deduplicated identity representing a person served by two separate agencies.

New Linda Johnson record from STVDP has been merged with Linda Johnstone record from MSDAC.

GOLDEN_PERSONS_ENCOUNTERS.csv

One master person. All their encounters. Case managers and county commissioners see a complete, cross-agency service history in a single flat file.

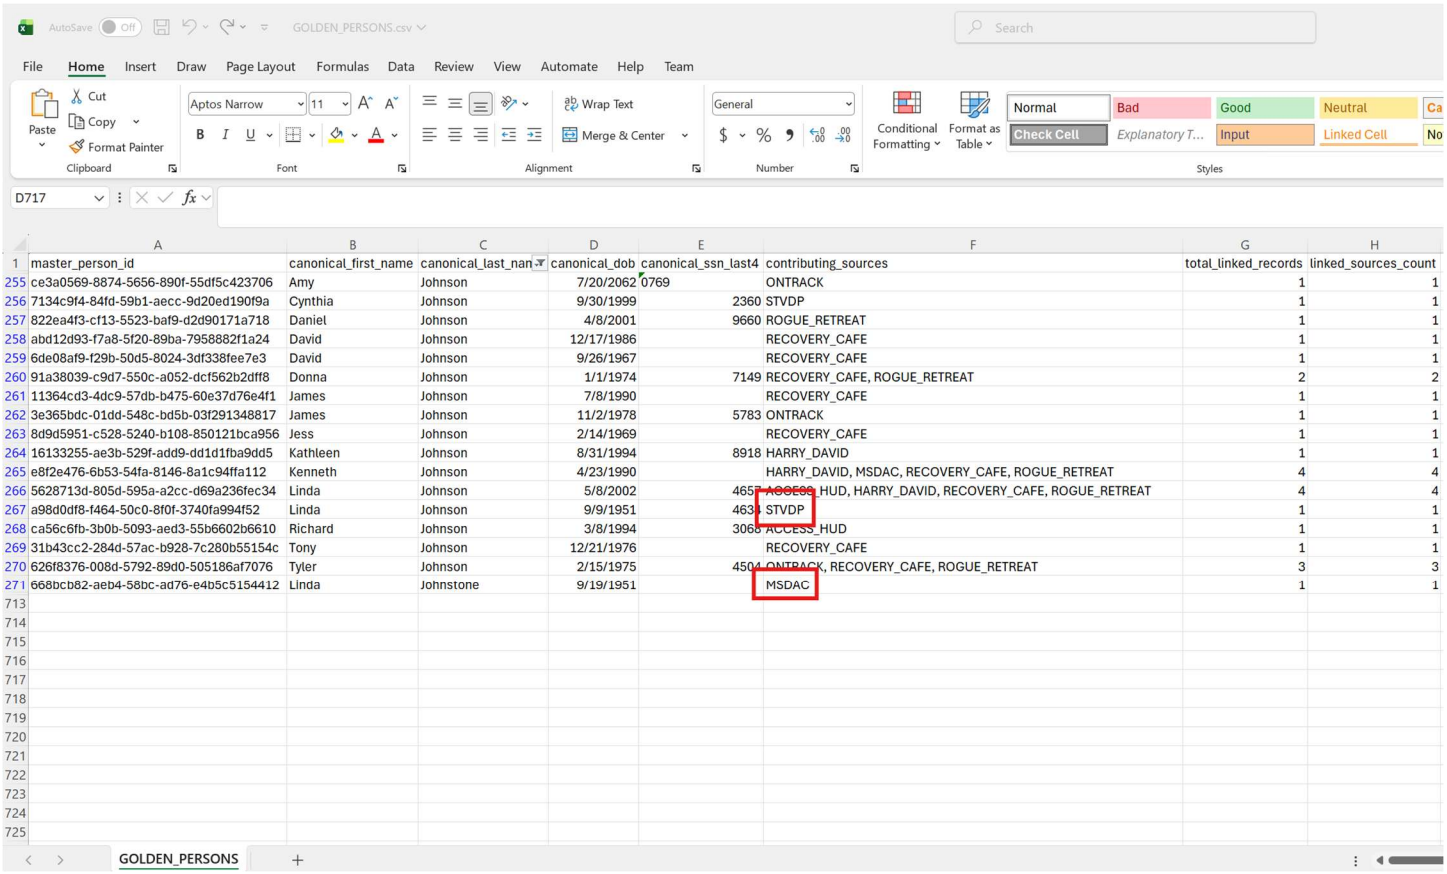

Has merged service records for Linda Johnstone from all homeless services in RRV with encounter dates.

Unlink records screen

The Records tab lets case managers manually split a merged identity. The split takes effect at export time — no pipeline re-run required — and every correction is stored in an auditable override file.

Confirm unlinked Linda Johnson and Linda Johnstone records.

GOLDEN_PERSONS.csv

The two records are now separate entries in the master index. The golden file reflects the correction immediately on the next export.

Lindas records from STVDP and MSDAC have been unlinked.
